

# ANNUAL REPORT

FY 2020 to FY 2022

**SWASTAVA**  
CANCER CARE

Created by Dhriti Communications, Hyderabad

# Outreach

We have conducted **1450+** awareness sessions covering about **30,000** youth and women in Telangana.

We have also conducted **32** screening camps in benefiting more than **6,000** women.

## We Believe

Cancer is preventable.

Cancer is curable.

Cancer is not contagious.

There is life after Cancer.

We must not get scared of Cancer; but fight it.

## Shri R P Singh President

### From The President

Times go unnoticed and it's a pleasure to see that Swastava Cancer Care is "7" Years old.

When I look back to the formative days, I recall a series of meetings, debates and brainstorming sessions that were done before writing down AIMS & OBJECTIVES.

Back then we decided to focus on creating Awareness, Early Cancer Detection through Screening in Women and Empowering Adolescent Youth and Hazards Created by Tobacco, Alcohol, Lack of Physical Hygiene, Menstrual Hygiene and problems due to HPV.

Over years we covered around 70 Villages in Telangana, screened over 4000 Women and Empowered 30,000 youth, thanks to generous support from Corporates like J K Fenner & Novartis and several like-minded philanthropists.

More recently with Rotary District 3150 we have taken up HPV, vaccinating girl children in the age group of 9 to 14 and creating awareness (still ongoing). Thanks to the Serum Institute of India

for coming out with an affordable HPV Vaccination, and the Government of India thinking of including HPV Vaccination in the National Immunization program, we at Swastava hope this vaccine would soon be accessible to all Indians.

We look forward to seeing that all girl children are vaccinated against HPV, Women Screened and our Awareness program help in eradicating Cervical cancer in Telangana.

We thank all the funding agencies and philanthropists who have been supporting us in our journey. We look forward to their continued support.

R P Singh  
President

## Dr Vasudev Chaturvedi General Secretary

### From the General Secretary

It is heartening to feel that we spent Seven very useful and purposeful years in Swastava Cancer Care. We have so far covered 56 villages covering 4200 women screened for Cervical, Breast and Oral Cancers. Swastava Jointly with Rotary District 3150 Vaccinated (with HPV Vaccine) over 1200 girls from various girl's homes in the age group of 9 to 14 years.

WHO has come out with a mandated that Cervical Cancer should be eradicated by 2030 and the methodology is in tune with the AIMS & OBJECTIVES of Swastava Cancer Care namely:

- Creating Awareness & Preventive Methods
- Vaccinating girl Children against HPV before their first sexual encounter (9 to 14 years).
- Educate the public and youth that HPV causes Cervical Cancer which is a sexually transmitted virus from men to women and women suffer from Cervical Cancer.
- Screening women who are 30 years & above for cervical cancer.
- Use safe sex practices through usage of condoms.

Swastava has been receiving timely support from the organizations like Novartis, J.K.Fenner, LIC of India, and

TDF (Telangana Development Forum) to enable us to meet the targets.

Goodera as part of CSR activity, has been organizing Cancer Awareness and Prevention sessions for volunteering senior executives of ArcelorMittal Steel, Tata Sons, HDFC-Ergo and so on. Swastava Cancer Care is getting the top rating from these executives attending the sessions. (of course, sessions were handled by me)

Cervical and Breast Cancer continue to be killers @ one woman every 5 minutes and it is the responsibility of every citizen to gain awareness and spread widely in society. I honestly feel that this is the only solution. People shouldn't feel shy to speak about safe sex and using condoms to prevent HPV infection.

Our sincere thanks to all Directors and Swastava Members and Dhriti Communications for extending untiring support to Swastava in meeting the targets. The learning experience Swastava is rendering to all members, especially to me is great and with humility, I thank God almighty for giving me this opportunity.

Vasudev Chaturvedi  
General Secretary

# CANCER AWARENESS

## Awareness Sessions

One of the core domains that we work on is to spread awareness about the risks, causes, course of action and management of various kinds of cancers. Under this domain, Team Swastava has been actively addressing myriad stakeholders in and around Hyderabad. Our awareness events focus on educating and informing the participants about risky behaviour that can potentially lead to cancer and encourage them to lead a healthy cancer-free life.

In the reporting period (FY 21-22 and 22-23), we conducted 12 such awareness events with an average participation of 100 people. The awareness sessions saw participation from Rotarians, Social Development Students, Community Health Workers, ASHA and ANMs and College students. These sessions were conducted

with support of many esteemed doctors, health administrators and corporate sponsors like Novartis.

A summary of activities under the reporting period is as follows:

12 Events

1230  
Participants

No-tobacco  
Walk

Guest  
Lecture at  
St Anns

Session with  
Rotarians

Zoom  
session on  
Pancreatic  
Cancer

Session  
with ASHA  
and ANM

Session  
with Students  
of PG College

Awareness  
for Anganwadi  
Teachers

## Early Detection and Screening

It has always been a vision of Swastava to enable early detection of cancer so as to address the same with success. In the aim, regular screening plays a crucial role and hence a core focus area. In the reporting period, Team Swastava conducted 24 camps, averaging at least one camp per month. These camps had twin objectives of spreading cancer awareness to general population, and screening women of childbearing age for cervical and breast cancers. In most cases a dentist also accompanied the team to screen for oral cancer.

We have received kind support of various doctors, some of whom are regular to our camps. These camps would not have been possible without their support and that of the funding partners like J K Fenner and Novartis

Overall, the average participation in each of these screening camps was more than 300 people. During the reporting period a total of 7200 people benefited from this activity, often conducted in rural districts where cancer awareness is low and screening facilities rare. A summary of activities under the reporting period is as follows:

24 Events	Total outreach 7200	2887 women screened
5 districts of Telangana	Partnership with CSR	Screening for Cervical Cancer
Screening for Breast Cancer	Cancer Awareness for all	Support from Govt

## Promoting vaccination for all

All awareness programs conducted by us not only talk about the risks and dangers of cancer but also about ways to prevent the same through behaviour change like quitting tobacco. One particular focus under this “prevention of cancer” effort is to raise awareness about HPV and vaccination for the same.

Cervical cancer is the fourth most common cancer among women globally, with an estimated 604,000 new cases and 342,000 deaths in 2020. About 90% of the new cases and deaths worldwide in 2020 occurred in low- and middle-income countries. Though there are several methods of prevention of cervical cancer, prevention by vaccination is emerging as the most effective option, with the availability of two vaccines.

Women get this virus from men. The virus only harms women and hence men act only as carriers. Given that the vaccination for this cancer-causing virus is available but is costly, we have launched a focused effort around its access for the needy.

During the reporting period, we conducted 2 vaccination events focused on identifying and vaccinating young girls to protect them from this deadly disease. As part of the “Cervical Cancer Mukht Telangana” initiative, we partnered with Rotary and Tanveer hospital to provide free vaccination to 55 young girls between the age of 9 and 14 years from Asha Kuteer (an NGO running an orphanage).

### **Reach them young**

The lack of cancer awareness among our general populace and more crucially the myths surrounding the same can be tackled by creating awareness about the facts. There is also a need to make the next generation aware of these things before they get exposed to the myths and cancer-causing lifestyle in the first place. To this end, Swastava Cancer Care has addressed many schoolchildren under the "reach them young" campaign. Our teams visit schools and talk to students from class 8 onwards about the causes of cancer and information about prevention methods. Children are made aware of the causes of the most prevalent cancers and ways to prevent them behaviourally. Our team of social workers and doctors place great emphasis on the importance of shunning tobacco and alcohol and leading a healthy lifestyle in general.

For girls, a separate session is organised and addressed by a gynaecologist whose focus is to make them aware of the risks of cervical and ovarian cancer. Tips on hygiene, safe menstrual practices, HPV Vaccination and other important behaviours make them aware and prepared for a healthy life.

In the reporting period, we have conducted 2 school outreach programs which were greatly successful. We participated in a large outreach program for NCC cadets that was organised by Rotary International in partnership with NGOs like Swastava, Goonj and Mohan Foundation at the Anurag Engineering College in Ghatkesar. Another such program organised at St Ann's College in Hyderabad addressed students and faculty members. Overall, we created awareness in more than 900 students in the reporting period.
